Global Antico Process Systems

Global's products are supplied to many different customers and process. Our PTFE Products are used to transfer the most corrosive, toxic hazardous chemical and related services in the field of demanding process requirement in terms of:

- Corrosion resistance
- Pressure resistance
- Regulatory, operational and other process related requirements

We are a global partner for companies operating in the chemical and pharmaceutical industries as well as for research organizations.

We support our customers throughout the entire life-cycle of their project, from basic design and engineering through manufacturing and installation to after-sales services and plant-optimization.

Our mission is to accelerate scientific progress and to increase productivity and sustainability of chemical and pharmaceutical manufacturing. Thereby, we advance health and well-being of a growing global population and enable a sustainable future.

Our ambition is to position the Group's future on a sustainable growth and profitable path. Based on the innovation and development of our technological capabilities we aim to provide our customers with a wider range of products, solutions and service offers while carrying on the century-long history of innovation, passion and solutions that defines Global Antico Process Systems.
